WHAT IS

INHALER ?

X-ODE is a product of electricity. It forms on asbestos while being electrically treated in a solution. This asbestos is put up in a glass vial. When the cork of the vial is removed and the air comes in contact with the asbestos, it emits from the inhaler a soothing gaseous substance, which will penetrate any part of the body. When inhaled through the nose or mouth, it penetrates every nook and crevice of the mucous surfaces, kills the germ that causes the disease, and gives the tissues a healthy condition, thus effecting a permanent cure. It is unlike snuff, drugs or medicine. X-ODE penetrates parts that it would be impossible for drugs or medicines to do.

Catarrh, Asthma, Hay Fever, Coughs, Headache, Bronchitis, La Grippe, etc., yield to its influence with marvelous rapidity.

This inhaler lasts from one to three years. Trial size inhaler, 15 cents; large size inhaler, \$1.00. All druggists or by mail.
