

BERZELIUS DORMITORY

To be erected on Hillhouse Avenue in the Summer.

THE FRESHMAN CREW.

Yale Has Been Very Good From the Start—Cornell Developed Late.

Gales Ferry, June 19.—The Freshman crew of 1900 is a remarkable crew, and is pronounced by the coaches to be one of the best that ever came to New London. Its members average somewhat younger than is usual with Freshman crews, but the men are a stockier, heavier and more powerful lot than has filled a Yale Freshman boat for many years.

STATISTICS.

	Age	H't.	Wt.
Bow, R. M. Patterson....	19	5.09	159
2, H. P. Wickes.....	18	5.10	171
3, J. P. Brock, Capt.....	17	5.10	181
4, R. P. Flint.....	21	5.11½	170
5, J. W. Cross.....	19	6.00	178
6, R. A. McGee.....	19	6.00	185
7, J. H. Neidecken.....	19	6.00	170
Stroke, W. B. Williams..	18	5.10	158
Cox, J. McL. Walton.....	19		113

Cornell's Youngsters.

Poughkeepsie, N. Y., June 19.—The condition of the Cornell Freshman Crew has been one of late development. For the first part of the season their condition was very unsatisfactory, but of late a great deal of work has been put on them, and Cornell feels much more hopeful about them than she did awhile ago. They are not, however, considered up to standard form.

Seven years ago, in 1890, Yale and Cornell Freshmen met at New London in a race which included Columbia also. Cornell won. As has been intimated, Wednesday's race promises to reverse

this. A Cornell Freshman Crew has never yet been beaten and the men who wear a red 1900 on their white jerseys may be counted on to do all in their power to prevent the break in the record from occurring this year.

They will in all probability row as follows:

	Age	Ht.	Wt.
Bow, Philip Will, E. E., Rochester, N. Y.....	19	5 10	165
2, Charles B. Smallwood, Arts, Warsaw, N. Y.....	22	5 10	163
3, Philip B. Windsor, C. E., Pittsfield, Mass.	18	5 9	154
4, Richard H. Gamwell, E. E., Pittsfield, Mass.....	18	5 9	154
5, Lee F. Hanmer, Opt., Bradford, N. Y.	23	5 10½	161
6, Charles W. Coit (Capt.), C. E., Holyoke, Mass.	20	6	155
7, Augustine R. Ayers, E. E., Toledo, Ohio.	18	5 9	138
Stroke, John W. Inlder, Science, Yonkers, N. Y.	20	5 8¾	146
Coxswain, Edward J. Magoffin, Science, North Tonawanda, N. Y.	24	5 5	110
Average	19y.7m.	5 10	154
Substitutes:			
Ralph W. Dorn, Arts, James-town, N. Y.	20	5 11	150
Moses E. Shire, C. E., Chicago, Ill.	19	5 10	138
Robert W. Beardlee, E. E., Ithaca, N. Y.	20	5 11	150

Harvard, 1900.

The following are the statistics of the Harvard Freshman Crew:—

	Age	Ht.	Wt.
Stroke—F. O. Byrd, New York..	19	6 0	164
7, N. Biddle, New York	18	6 0	154½
6, F. L. Higginson, Boston.....	18	6 2	162
5, R. C. Heath, Boston.....	19	6 2	172
4, N. W. Tilton, Cambridge ..	18	6 2	172
3, J. M. Glidden, Newcastle ..	18	6 0	162
2, C. M. Brown, Worcester ..	18	5 9	162
Bow—J. L. Saltonstall, Boston..	19	5 11	155
Coxswain—A. M. Rock, Philadelphia	19	5 6	116
Substitutes:			
E. W. Howard, E. Gray, Jr., J. D. Kernan, H. Fitzgerald.			

BERZELIUS DORMITORY.

The Scientific Society's New Building. Details of Construction.

Another and very striking addition to the Scientific School society buildings will be seen about six months from now, when Berzelius completes the structure, a cut of which is given on this page. Arrangements for proceeding at once with the work have been made, and ground will be broken this summer.

The building will be on the east side of Hillhouse avenue, between Grove and Trumbull streets, on the second lot south of Trumbull. The property which has been purchased was a part of the lot on which stands the residence of ex-Judge John M. Hall, and the Society house will be the next structure to his residence. The lot has a frontage on Hillhouse avenue of 70 feet, is 98 feet deep and has a rear width of 132 feet.

The architecture is, quite appropriately, of the Colonial type, recalling in a measure the ideas prevailing in architecture in the early days of Yale, and of the Society which erects it.

The base will be of granite, and the red burnt brick of the walls will be set off by the white painted wood cornices, columns and balustrades. The window sills and key blocks will be of limestone.

Through the left hand doorway will be reached the reception room, which is 17x18 feet, without the bays, and is lighted on three sides. The two bays in this room will be entered by arches and arranged with seats. Correspondingly opposite to the reception room is the billiard room, which is the same

size as the reception room, but for the toilet room which opens from it.

The living room, the main feature of the house, will be 31x37 feet, and wainscoted in dark oak to a height of 10 feet. The ceiling is to be heavily beamed in oak, and beams stained dark to match the color of the wainscoting. The surface between the beams will be rough plastered. The floor will be furnished with ¾-inch white oak, laid in large squares and stained dark to harmonize with wainscot.

On the east side, a large mantle, the opening of which is 7 feet high, is to form an important feature of the room. The room will be lighted by five large circular head windows, one on either side of the mantle and three on the west side. These last three are casement windows, opening to the floor and giving access to the piazza. There will be large openings from this room to the halls and thence to the reception room and billiard room, so that in case of receptions and other social functions, the entire first floor of the building can be thrown open.

The rest of the building will be given up to dormitory accommodations of a most satisfactory and comfortable order.

The halls are to be fire-proof, incased by brick walls, and the staircases will be throughout of iron with marble treads.

Yale-Harvard Football.

Arrangements are practically completed for the Yale-Harvard football game next Fall. It will be played in Cambridge on November 13. The umpire will be Mr. Paul Dashiell. The arrangements for the Princeton game are still under way.

THE CORNELL STROKE.

Three positions of Bentley, of the Ithaca Eight.

AT CATCH.

AT MIDDLE OF STROKE.

AT FINISH OF STROKE.
