A Progressive University.

[Editorial in Waterbury American.]

The University of Chicago, as becomes a university in the sort of a city that Chicago is, reports through President Harper a continuance of its booming prosperity. It has needed an income of \$729,000 a year, and so Mr. Rockefeller has given it another \$200,000 to help toward that amount. It has secured in Rush College, a leading medical institution of Chicago, a medical department of equal standing with its other departments. It is to establish a college of commerce and politics where the students will study railroads, finance, insurance, manufacturing, trade, diplomatic service and journalism. It proposes soon to establish a college for teachers in the public schools of the city, to enable them to pursue higher studies while continuing at work. What other university of them all can show an equal push and capacity to do all—more than all that is expected of it?

A Bust of Dr. Barnard.

A marble bust of Dr. Henry Barnard, '30, the distinguished educator of Connecticut, has been ordered by the alumni of the State Normal School of Rhode Island, and will be placed in the new building of that school in Providence. Albert Jaegers of New York has completed the plaster cast and the finishing of the marble will be completed in a short time.

Established 1858.

The New York and Florida Limited. Between New York and St. Augustine.

Unusually elaborate preparations have been completed by the Southern Railway Company to perfect the service of the New York and Florida Limited, which will be operated from New York City on and after January 17, 1898, via Pennsylvania Southern Railway, F., C. and P. and Florida East Coast Line. This trip of more than 1,000 miles is made by the Limited trains of the Southern with but one night of travel, and the aim of the company is to make this season of travel noteworthy in that the appointments of the trains will rival their speed.

The first of the five cars is a composite baggage and smoker. No. 2 is a magnificently decorated and equipped dining car in charge of experienced chefs and staff. Nos. 3 and 4 are drawing-room sleeping cars, each containing twelve sections, a drawing room, smoking room, wash and toilet rooms. No. 5 is a compartment car containing two drawing rooms and seven staterooms, luxuriantly furnished. The observation car is the sixth and last, and it will be a model of its kind, containing, in addition to the observation parlor at the rear of the train, a secretary, a carefully selected library of the newest books and periodicals, a buffet, and ten sections.

Tired New Yorkers and invalids will find in the Florida Limited the nearest approach to perfection in railroad travel that can be obtained, for, in providing speed and comfort, the details and trifles have not been overlooked, but, on the contrary, have been studied from every point of view, and the result is the most luxuriant train in the world. Attached to the Limited is a Pullman drawing room sleeping car, New York to Augusta. For descriptive matter, diagrams, etc., of the Florida Limited, call on or address Alex. S. Thweatt, Eastern Passenger Agent, 271 Broadway, New York City.
