

The Honor to Doctor Day.

The many friends in the University of Dr. Arthur L. Day, Yale '92, will be gratified to learn that he has been appointed one of the corps of twelve physicists at the Physikalisch-Technische Reichsanstalt at Charlottenburg, Dr. Day is the first American to receive this honor.

At graduation Dr. Day was appointed John Sloane Fellow in Physics and As-

DR. A. L. DAY, '92.

sistant in the Sloane Laboratory. He received the Doctor's degree in '94, and was immediately appointed Instructor in Physics for a term of three years. As a teacher he showed very unusual

ability. Resigning his position here for further study abroad, last October he went to Berlin and secured an appointment in the Reichsanstalt as President Kohlrausch's private assistant; on May first of this year he was elected one of the premanent staff.

The Reichsanstalt is maintained by the German Government and, in some respects, is like our Smithsonian Institute at Washington. As indicated by its name the work of the Anstalt is divided into two main departments. In the technical department are kept the government standards of weights, measures, thermometers, electrical standards, etc. The government maintains here fifty experts whose duties are to perfect apparatus for measurements of all physical quantities and the maintenance of the standards. Any institution or manufacturer of physical apparatus may send their instruments here to be tested and compared with the government standards. It is recognized among physicists that the methods and resources of this institution are superior to anything in the world.

The physical department is subdivided into four sections for research work: Heat, Electricity, Magnetism and Thermometry. Every experiment has a separate room where all conditions are made most favorable. In this laboratory, where the methods and equipment are superior, it is not surprising that so much good work is done. Among the staff of twelve physicists are Prof. Holborn and several others who are widely known by their published works. Dr. Day at present is working with Prof. Holborn in investigating methods for accurately registering very high and very low temperatures. When completed their results will probably appear in Wiedemann's Annalen.

President Kolrausch, the successor of Helmholtz, is at the head of the institution. He has a mind wonderfully re-

sourceful in overcoming experimental difficulties. There are no students at the Anstalt and the government provides most liberally for all its needs.

The Connecticut Board of Health has issued a final order, forbidding all boating on Lake Whitney above the second bridge, and have charged the New Haven Water Company to enforce the rule. This will in no way hinder either the Spring or Fall regattas, as the entire course for the scrub and class races lies below the second bridge.

THE OLD RELIABLE PARKER GUN HAS NO RIVAL!!!

The Parker Gun has stood the test of over Thirty years. "Most perfect shooting Gun made." Send for Catalogue.

N. Y. SALESROOMS, 96 CHAMBERS ST. PARKER BROS., MERIDEN, CONN.

Yale Entrance Examinations in Mathematics.

COMPILED BY RICHARD MATHER.

Including all papers in Plane and Solid Geometry, Algebra to and from Quadratics, and Trigonometry, for the Scientific and Academic Departments, between the years 1884 and 1898. 8vo, cloth, 146 pages, substantially bound in cloth. Price \$2.00.

Address: T. W. MATHER, Boardman School Press, New Haven, Conn.

YALE MEN!

When you are ready to talk about your Class Supper, or Spreads of any description, you can avoid lots of trouble by addressing the old reliable **Yale Caterer.**
